

Brass Cylinders

Single Acting Micro Cylinder Ø 3mm x 6mm Stroke

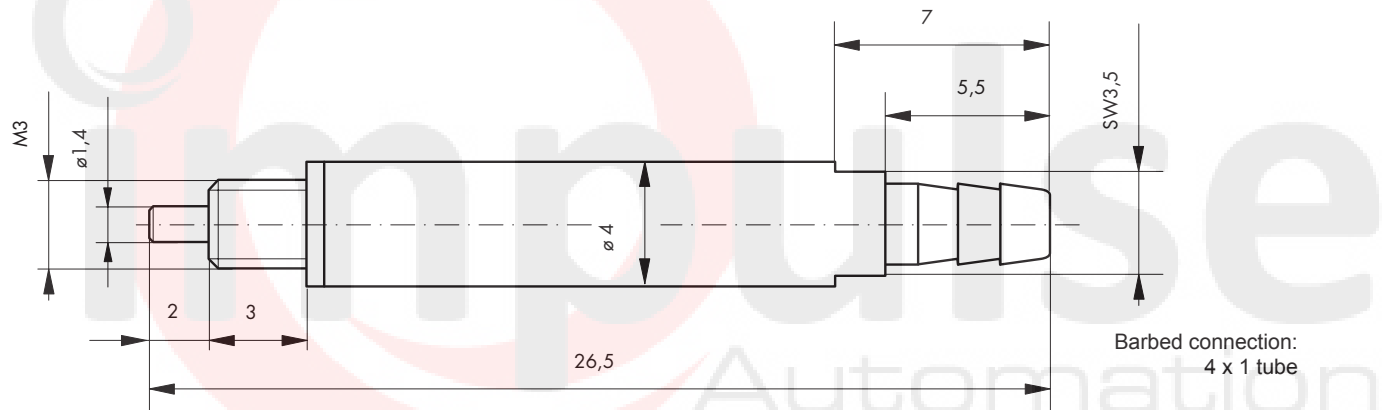

Technical information

Operating pressure:	3-10 bar
Temperature range:	-10°C...+70°C
Housing/end caps:	Brass
Rod:	Cr-Ni steel
Seals:	NBR
Lubricant:	Shell Tellus C10
Operating medium:	5 micron filtered, lubricated or non-lubricated compressed air.

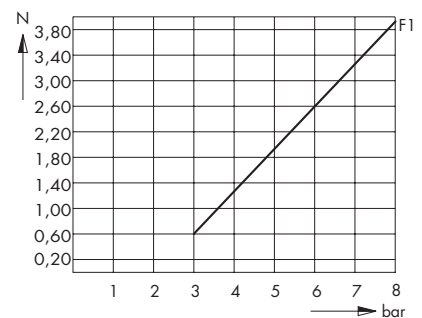

Dimensional drawings

To order: 
40.100 3mm bore x 6mm stroke

This micro cylinder with a piston diameter of only 3mm has been designed for general purpose use particularly for testing and other applications where there is restricted space.

Ø 3 mm

F1 = single acting cylinders

Springs are designed for the return of the piston not the coupled mass.
