**TECH DATA SHEET 615** 17/08/2020

# **75 Series**

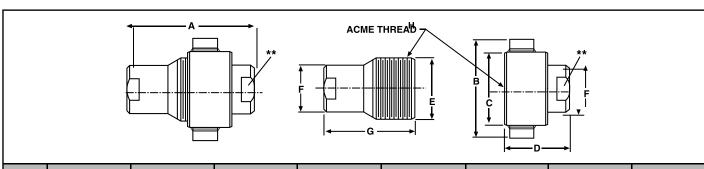

Series 75 is designed and constructed for high pressure hydraulic service. Although these couplings are used in a broad variety of heavy-duty applications. A primary usage is in oil fields and offshore drilling, cranes, power tongs and swivels, diving etc.

- Connect under residual pressure
- Up to 5,000 psi (345 bar) rated pressures
- Thread-to-connect
- Rugged steel construction with Zinc Trivalent Chromate plating
- Stainless steel construction also available
- Wide range of sizes
- · Choice of seal materials to
- handle a variety of fluids

   DBP version is "Fire Safe" rated to API 16D

<sup>\*</sup>Hex dimensions are taken from flat of hex and not across corners.

Decimal dimensions are ± .06 in. (1.5mm)

Dimensions are subject to change without notice.

Part configurations are typical and do not necessarily represent actual appearance.

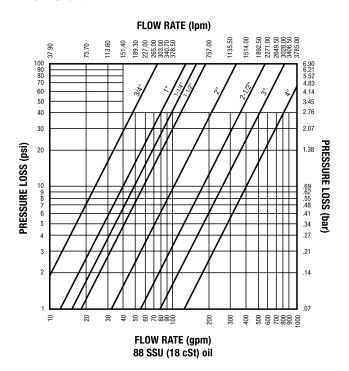

<sup>\*\*</sup>Wrench flats are special order. See "How to Order".

4"	400	610	400	28	1,000	69	-	-	

Burst pressures listed were taken at the point at which failure rendered the quick-disconnect inoperative. (Proof pressure equals 1-1/2 times the operating pressure). NOTE: Pressure Ratings were established under static pressure conditions.

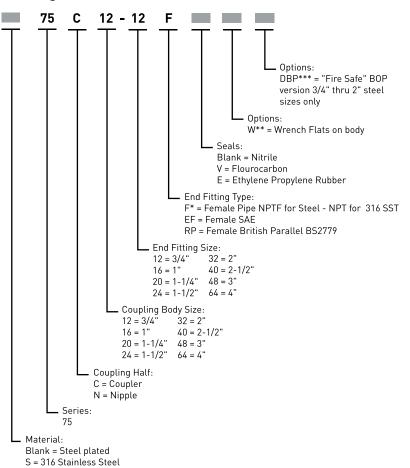

For impulse applications, multiply the above pressure ratings by .6 for approximate pressure ratings.

# **Ordering Information**

- \* For sizes up to 3", NPTF threads. For sizes over 3", NPT threads.
  \*\*Not available on 2" EF coupler. Standard on 2-1/2" and larger sizes (code not needed).
  \*\*\*DBP available in 3/4" through 2" sizes. Steel material only.
- <sup>†</sup>Seal material code not applicable with DBP option-leave blank.

**Note:** Not all configurations are standard product offering. Contact QCD for price and delivery.
